Description:

IEEE ICTMOD is the premier international conference on technology and management. The program will combine strategic keynote presentations and panels, technical and policy papers, case studies, workshops, tutorials, posters exhibition and social networking activities.

This special issue of IEEE ICTMOD seeks to examine digital innovation and strategic transformation that is driving the industries, government and the society. It will showcase innovative smart services, digital products and platforms discuss current issues, challenges and practices and look into future prospects.

The international Technology Management Conference will be held in Rabat (Morocco) on November 22, 23 and 24, 2023. This edition is organized by CIEMS Research, KMICA and INPT and is sponsored by Technology and Engineering Management Society (TEMS).

IEEE ICTMOD will provide an excellent opportunity for presenting new results and to discuss the latest research and developments in the field. Participation of young scientists is strongly encouraged.

Participation of scientists from academia and industry is particularly welcome. The program will include also considerable space for promoting new technical applications and developments, real-world challenges and success stories.

IEEE ICTMOD invites high quality papers to be presented at this premier international event. Submissions should contribute to a substantial, original and previously unpublished research in the topics of the conference. This includes, but is not limited to:

- Theoretical research papers that provide new concepts in the domain of engineering, technology, innovation, business transformation and its social impacts;
- Empirical studies and qualitative case studies that develop new insights;
- System design and development papers that go beyond the pure description of systems and give insight into theory and effectiveness of the approach;
- Verification and validation papers that evaluate the application of solutions.

Publication:

All accepted papers will be submitted for inclusion in IEEE Xplore Digital Library as well as other Abstracting and Indexing (A&I) databases (Scopus, Web of Science, ProQuest, IET, NLM, CrossRef).

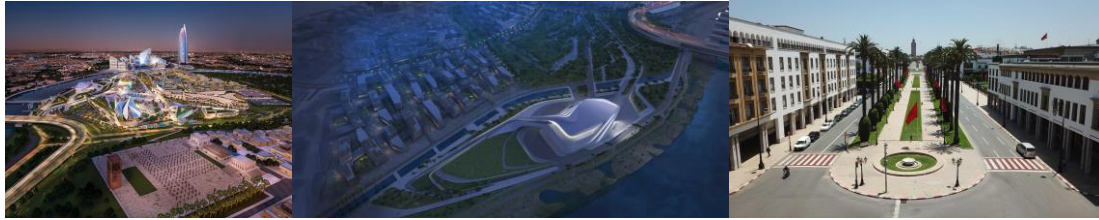

Following the conference, authors of selected high-quality papers will be advised to submit, after substantial revision and improvement according to journals' requirements and guidelines, their papers for following special issues and regular issues high-impact international academic journals, where they will undergo the traditional double-blind peer review process.

Conference Tracks:

We seek high-quality papers focusing on these areas from industry, business, academia and government. IEEE ICTMOD 2023 will be organized in the context of sixteen main tracks (non-exhaustive list):
